

KAILA Founder-Grade Package

Index, usage guide, and recommended reading order

Package Purpose

This founder-grade package is designed to keep the KAILA idea organized, persuasive, and actionable. It is written for early co-founder discussions, validation planning, startup preparation, and future pitching.

How to Use This Package

- Read the Master Business Proposal first to understand the full opportunity.
- Use the Business Model Canvas to discuss assumptions with potential co-founders.
- Use the Market Validation Study before building the product.
- Use the Provider Recruitment Playbook to recruit the first supply side of the marketplace.
- Use the MVP Specification only after the business need is validated.
- Use the Financial Model as an editable planning tool, not as a promise of results.
- Use the Founders Agreement Draft as a discussion guide before anyone starts serious work.

File Map

File	Purpose
01 Master Business Proposal.pdf	Full business case, problem, market, model, strategy, risks, roadmap, and references.
02 Business Model Canvas and Lean Canvas.pdf	One-page strategic models for explaining and refining the business.
03 Market Validation and Feasibility Study.pdf	Research design, surveys, interviews, scoring, and go/no-go criteria.
04 Provider Recruitment and Operations Playbook.pdf	How to recruit, verify, onboard, support, and retain service providers.
05 MVP Functional Specification.pdf	Product scope, user flows, modules, database concepts, and release plan.
06 Investor Style Pitch Deck.pdf	Slide-style PDF for presenting the opportunity clearly.
07 Founders Agreement Discussion Draft.pdf	Non-legal draft for roles, ownership, contributions, and governance discussions.
08_Three_Year_Financial_Projection.xlsx	Editable assumptions, revenue projections, costs, cash flow, and unit economics.
09 Field Forms Pack.pdf	Print-ready forms for interviews, surveys, provider signup, and meeting notes.

Important Reminder

KAILA should be treated as a business validation project first and a software project second. The strongest goal for the next phase is not to build the app immediately, but to prove that clients and service providers are willing to use a structured marketplace.

Definition of Terms

These terms provide a shared vocabulary for reading and discussing the KAILA founder package.

KAILA

The proposed local services marketplace that helps clients find trusted local help and helps skilled workers become more visible.

Client

A person, household, business, or organization that posts a service need or hires a provider through KAILA.

Provider

A skilled worker, freelancer, technician, shop, or service professional who offers work through KAILA.

Service Request

A client post describing the job needed, location, budget, urgency, details, and optional photos or files.

Offer

A provider's response to a service request, including price, availability, scope notes, or proposed schedule.

Counter-Offer

A revised offer made when the provider or client proposes a different price, schedule, or service scope.

Marketplace

The two-sided system where clients and providers discover, evaluate, transact, and rate each other.

MVP

Minimum Viable Product; the simplest usable version of KAILA needed to test marketplace behavior.

Pilot

A limited real-world launch in one city or area used to validate demand, provider response, operations, and trust.

Concierge Pilot

Marketplace test using the existing app plus Facebook concierge posts, Messenger follow-up, and manual support.

Verification

The process of checking provider identity, service information, work samples, permits, certificates, or references.

Rating

A post-job score or review used to build trust, measure reliability, and improve future matching decisions.

Dispute

A reported disagreement about price, quality, scope, completion, behavior, payment, or other job-related concerns.

Lead Credit

A future monetization unit that may allow providers to access or respond to qualified service opportunities.

Premium Profile

A future paid provider profile upgrade that may improve visibility, presentation, or trust signals.

Business Account

A future account type for shops, small businesses, teams, or organizations with recurring service needs or multiple providers.

Go/No-Go Criteria

The evidence-based thresholds used to decide whether to proceed, narrow the scope, redesign, or pause.
