

KAILA Business Model Canvas

Strategic startup models, assumptions, and decision rules

Business Model Canvas

Use this section as a discussion document. Each box contains early assumptions that must be tested through interviews and pilot operations.

Canvas Block	KAILA Assumption
Customer Segments	Clients: households, renters, homeowners, small businesses, students, local institutions. Providers: skilled workers, technicians, freelancers, odd-job workers, certified and experienced-but-uncertified providers.
Value Propositions	Clients find trusted local help faster. Providers become visible, get opportunities, and build reputation. Communities unlock local skill supply.
Channels	Facebook page, community groups, Messenger, referrals, barangay networks, college alumni networks, local business partners, mobile-friendly website, future mobile app.
Customer Relationships	Trust-based marketplace, ratings, reviews, provider profiles, verification badges, support desk, dispute handling, community moderation.
Revenue Streams	Free pilot. Later: featured listings, premium profiles, lead credits, subscription plans, small commissions, advertising partnerships, business accounts.
Key Resources	Founder team, provider network, client base, platform, brand, verification system, operations playbook, community trust.
Key Activities	Provider recruitment, market validation, request matching, platform development, support, moderation, verification, marketing, analytics.
Key Partners	Skilled workers, local repair shops, hardware stores, electronics stores, schools, community leaders, local businesses, future payment partners.
Cost Structure	Domain, hosting, SMS/email notifications, branding, local marketing, field recruitment, support, legal setup, payment processing, development time.

Lean Canvas

This version is more startup-focused and should be revisited after validation.

Canvas Block	KAILA Assumption
Problem	Clients cannot easily find trusted service providers. Skilled workers remain invisible. Social media referrals are scattered and hard to compare.
Customer Segments	Pilot city households and small businesses; local skilled workers seeking more jobs.
Unique Value Proposition	KAILA answers "Naa moy kaila?" with trusted, rated, local service providers.
Solution	Request posting, category matching, provider profiles, offers/counter-offers, messaging, ratings, admin controls.
Channels	Facebook, Messenger, referrals, barangay networks, pilot landing page, provider outreach.
Revenue Streams	Start free. Test premium visibility, lead credits, subscriptions, commissions, and business accounts after usage is proven.
Cost Structure	Development, hosting, notifications, support, field recruitment, verification, marketing, legal setup.
Key Metrics	Active providers, posted requests, response rate, offers per request, completed jobs, repeat usage, ratings, revenue.
Unfair Advantage	Local behavior insight, provider-first recruitment, community trust, and operational validation before full product build.

Business Model Decision Rules

- Do not monetize before trust and usage are proven.
- Start with provider visibility or lead products before commissions.
- Keep the pilot narrow enough to manually support.
- Prioritize categories with urgent need and reliable provider response.
- If provider supply is weak, pause product development and recruit first.

Definition of Terms

These terms provide a shared vocabulary for reading and discussing the KAILA founder package.

KAILA

The proposed local services marketplace that helps clients find trusted local help and helps skilled workers become more visible.

Client

A person, household, business, or organization that posts a service need or hires a provider through KAILA.

Provider

A skilled worker, freelancer, technician, shop, or service professional who offers work through KAILA.

Service Request

A client post describing the job needed, location, budget, urgency, details, and optional photos or files.

Offer

A provider's response to a service request, including price, availability, scope notes, or proposed schedule.

Counter-Offer

A revised offer made when the provider or client proposes a different price, schedule, or service scope.

Marketplace

The two-sided system where clients and providers discover, evaluate, transact, and rate each other.

MVP

Minimum Viable Product; the simplest usable version of KAILA needed to test marketplace behavior.

Pilot

A limited real-world launch in one city or area used to validate demand, provider response, operations, and trust.

Concierge Pilot

Marketplace test using the existing app plus Facebook concierge posts, Messenger follow-up, and manual support.

Verification

The process of checking provider identity, service information, work samples, permits, certificates, or references.

Rating

A post-job score or review used to build trust, measure reliability, and improve future matching decisions.

Dispute

A reported disagreement about price, quality, scope, completion, behavior, payment, or other job-related concerns.

Lead Credit

A future monetization unit that may allow providers to access or respond to qualified service opportunities.

Premium Profile

A future paid provider profile upgrade that may improve visibility, presentation, or trust signals.

Business Account

A future account type for shops, small businesses, teams, or organizations with recurring service needs or multiple providers.

Go/No-Go Criteria

The evidence-based thresholds used to decide whether to proceed, narrow the scope, redesign, or pause.
