

KAILA

Detailed To-Do List + Complete Templates and Forms

Readable PowerPoint version with larger text and the full forms/templates pack included.

Validation first

Build proof before building the app.

Provider supply first

Recruit providers before client launch.

Trust first

Use levels, ratings, and records.

Prepared for the first KAILA Gingoog Concierge Pilot

How to Use This Deck

Designed to be readable on-screen and useful as an operations checklist.

- Use Section 1 as the startup execution guide for the first 90 days.
Use Section 2 as the complete templates/forms pack for in-app forms, Google Sheets, Messenger, and meetings.
Copy each form field exactly, then adjust local wording if needed.
Keep this deck as the operating playbook during the concierge pilot.

Section 1

Execution Roadmap

- 90-day sequence
- Founder alignment
- Provider-first pilot
- Manual matching workflow
- Metrics and go/no-go decision

The Main Rule

KAILA starts as a validation project before it becomes a software project.

Risky path

Full app → no users → wasted time

Right path

Manual pilot → evidence → focused MVP

First proof needed

Requests, provider offers, completed/strongly matched jobs, ratings, manageable disputes.

90-Day Starting Roadmap

A disciplined sequence for turning KAILA into evidence.

Record every step: request time, providers contacted, response time, offers, selected provider, agreed amount, completion, ratings, and issues.

Phase 0: Founder Alignment

Agree on the operating philosophy before asking anyone to join.

- ☐ Write: KAILA is validation first, software second.
- ☐ Agree that the first version is manual, free, local, and provider-first.
- ☐ Define KAILA as a local trust and service-matching system, not just an app.
- ☐ Name the first pilot owner and backup owner.
- ☐ List founder roles even if one person handles several roles.
- ☐ Create a simple decision log for major choices.
- ☐ Agree that provider trust levels will be used from the start.
- ☐ Agree not to monetize until usage and trust are proven.

Phase 1: Define the First Pilot

Keep the first version narrow enough to operate and measure.

Field	Input / Notes
Pilot area	Gingoog City or selected barangay cluster. List exact barangays before launch.
Clients	Households, renters, homeowners, students, small businesses, offices, and local shops.
Providers	Skilled workers, repair technicians, freelancers, small shops, experienced workers, certified providers if available.
Duration	30–45 active matching days, plus preparation and review days.
Pricing	Free for clients and providers during validation. No commission or subscription yet.
Primary goal	Learn fast without creating a heavy operation.

Choose 5-8 Starting Categories

Select practical, common, and manageable local services.

Appliance repair

Urgent household need

Plumbing

Leaks, clogs, toilets, faucets

Electrical

Common but safety-sensitive

Computer repair

Students, offices, homes

Motorcycle repair

Local mobility need

Carpentry / maintenance

Small repairs and installs

Cleaning / odd jobs

Flexible supply

Digital services

Layouts, designs, basic tech

Phase 2: Build the Manual System

Use the existing app first. Let the concierge pilot teach the next improvements.

- ☐ Create Facebook Page for public presence.
- ☐ Create Provider Signup Form for supply intake.
- ☐ Create Client Request Form for demand intake.
- ☐ Create Provider Sheet as the supply database.
- ☐ Create Request Tracker for job evidence.
- ☐ Create Completed Job Log for final outcomes.
- ☐ Create Dispute Log for issues and resolutions.
- ☐ Use Messenger for manual matching and updates.

Phase 3: Recruit Providers First

Clients will only trust KAILA if relevant providers are already available.

- ☐ Build a 100-provider lead list.
- ☐ Contact the first 20 provider leads on Day 7.
- ☐ Ask every provider for two referrals.
- ☐ Group providers by category and barangay.
- ☐ Collect service area, availability, price range, and work samples.
- ☐ Target 50 listed providers before heavy client promotion.
- ☐ Make sure each request can be sent to 3-5 relevant providers.
- ☐ Mark fast-reply providers as priority providers.

Provider Pitch Must Answer

Keep the provider message simple and practical.

Will this help me get clients?

Explain that KAILA forwards relevant local requests.

Is it free?

Confirm the pilot is free while validation is ongoing.

Can I accept or decline?

Providers can accept, decline, or counter-offer.

Can I control my price?

Providers submit their own offer or schedule.

Phase 4: Make Trust Visible

Do not present all providers as equally verified.

Field	Input / Notes
Level 1: Listed	Basic profile submitted. Not yet verified.
Level 2: Identity Verified	ID or basic identity check completed with consent.
Level 3: Work Verified	Work samples, references, or completed pilot jobs.
Level 4: Top Rated	Good ratings, fast response, completed jobs, low dispute rate.
Level 5: Certified / Business Verified	Certificate, permit, shop, training proof, or recognized business background.

Phase 5: Validate Client Demand

Listen for repeated pain points before launching publicly.

- ☐ Prepare client survey form.
- ☐ Collect 100 resident responses if possible.
- ☐ Get at least 30–50 strong responses before first active requests.
- ☐ Record hardest-to-find services.
- ☐ Record common trust problems.
- ☐ Record pricing confusion.
- ☐ Record response-time frustrations.
- ☐ List top service categories requested by clients.

Client Pain Points to Track

Repeated pain points are stronger than one-off opinions.

“Lisod mangita ug kasaligan”

Trust problem

“Walay klaro nga presyo”

Pricing problem

“Dugay mu-reply”

Response problem

“Referral ra gyud mi magsalig”

Informal discovery

“Wala ko kabalo kinsa duol”

Location discovery

Phase 6: Run the Concierge Pilot

The first KAILA workflow should be manual, measurable, and repeatable.

Record every step: request time, providers contacted, response time, offers, selected provider, agreed amount, completion, ratings, and issues.

Phase 7: Track the Right Metrics

The pilot must be judged by evidence, not excitement.

Field

Input / Notes

Active providers

Shows supply strength and category readiness.

Requests

Shows demand from clients.

Response rate

Shows provider seriousness.

Offers per request

Shows marketplace activity.

Completed jobs

Shows actual value created.

Ratings

Shows trust and feedback behavior.

Disputes

Shows risk and quality problems.

GMV

Total peso value of completed jobs through KAILA.

Phase 8: Go / No-Go Decision

After the pilot, choose the next move based on evidence.

Field	Input / Notes
Proceed to MVP	Real requests, provider response, 15+ completed/strongly matched jobs, ratings accepted, disputes manageable.
Narrow scope	Only 1-2 categories work strongly. Focus on winning categories instead of stopping.
Redesign / pause	Providers refuse, clients avoid posting, trust barriers are too high, or operations cannot support matching.

Phase 9: Build MVP Only After Strong Signals

The MVP should digitize the proven manual workflow.

Field	Input / Notes
Client side	Register, post request, compare offers, choose provider, confirm completion, rate provider.
Provider side	Create profile, view matching requests, send offer, update job status, rate client.
Admin side	Manage users, verify providers, track jobs, handle disputes, view reports.
Postpone	In-app payments, GPS tracking, native apps, complex AI matching, large-scale automation.

Phase 10: Monetize Slowly

Do not charge until providers feel real value.

Field	Input / Notes
1. Free pilot	Build trust, track behavior, and prove the service flow.
2. Visibility products	Premium profiles, featured listings, badge display, provider highlights.
3. Lead / transaction revenue	Lead credits, subscriptions, small commission, business accounts only after usage is proven.
Recommended first paid product	Provider visibility package, not commission.

Founder Roles Must Be Clear

Even if one person holds several roles, responsibilities should be named.

Product / Tech

Vision, MVP planning, technical direction

Provider Acquisition

Recruitment, onboarding, provider feedback

Operations

Matching, support, disputes, tracking

Marketing / Community

Facebook page, client education, local partners

Finance / Admin

Budget, records, reports, compliance prep

Business Strategy

Model, partnerships, pilot decisions

Protect KAILA Early

Treat data, brand, provider records, and internal strategy carefully.

- ☐ Limit access to provider list.
- ☐ Share only necessary client details with providers.
- ☐ Ask permission before using photos/videos publicly.
- ☐ Keep ratings and disputes factual.
- ☐ Organize brand files, forms, sheets, reports, and pitch materials.
- ☐ Clarify ownership of code and source files.
- ☐ Store verification materials securely.
- ☐ Use request IDs and provider IDs instead of informal filenames.

Weekly Operating Rhythm

Review evidence, improve the workflow, and assign next actions.

- ☐ Update provider sheet, request tracker, job log, and dispute log.
- ☐ Compute weekly metrics: providers, requests, offers, jobs, ratings, disputes, GMV.
- ☐ Identify top 3 lessons and top 3 problems.
- ☐ Review strongest and weakest categories.
- ☐ Assign owners and deadlines for next actions.
- ☐ Update scripts, forms, and rules based on actual problems.
- ☐ Document decisions clearly.
- ☐ Prepare a short weekly summary.

First 7 Days: Exact Starter Checklist

Start immediately without building the app.

- ☐ Day 1: Decide pilot area, categories, client groups, provider groups, and free-pilot policy.
- ☐ Day 2: Create Facebook page, add description, contact details, category list, and pinned post.
- ☐ Day 3: Create provider form and provider database sheet.
- ☐ Day 4: Create client request form, request tracker, job log, and dispute log.
- ☐ Day 5: Write rules, scripts, matching message, offer comparison, and rating templates.
- ☐ Day 6: Build 100-provider lead list.
- ☐ Day 7: Contact first 20 provider leads and start onboarding.

Recommended First Move

KAILA Gingoog Concierge Pilot

50 providers

Recruit and categorize

100 client responses

Survey and validate demand

30 real requests

Collect during pilot

15 completed / matched jobs

Minimum strong evidence target

5-8 categories

Narrow and manageable

30-45 days

Active matching period

Section 2

Complete Templates and Forms Pack

- Provider forms
- Client request forms
- Tracking sheets
- Scripts and messages
- Weekly reports and scorecards

Forms Pack Overview

Use the in-app forms first; keep these templates as backup for Sheets, Messenger, and meeting notes.

- Provider Signup Form: collects provider identity, services, availability, pricing, proof, and consent.
- Client Request Form: collects demand details for matching.
- Tracking Sheets: provider database, request tracker, completed job log, dispute log.
- Survey + Interview Forms: collect validation evidence before and during launch.
- Scripts + Message Templates: standardize provider recruitment, forwarding, offers, and ratings.

Provider Signup Form — Part 1

Use the in-app form; keep this as backup. Use this to collect basic provider identity and contact details.

Field	Input / Notes
Full name	Short answer. Legal name or complete name.
Display name	Short answer. Name that may be shown to clients.
Contact number	Short answer. Required for pilot coordination.
Messenger / Facebook link	Short answer. Preferred for fast communication.
Barangay / area	Short answer or dropdown. Helps match by location.
Preferred contact channel	Multiple choice: Messenger, SMS, Call, Email, Other.
Best time to contact	Short answer. Example: 6 PM–9 PM.
Provider type	Multiple choice: Individual, Freelancer, Shop, Small team, Business.

Provider Signup Form — Part 2

Service details, skills, coverage, and availability.

Field	Input / Notes
Main service category	Dropdown: Appliance, Plumbing, Electrical, Computer, Motorcycle, Carpentry, Cleaning, Digital, Other.
Specific services offered	Paragraph. Ask for exact jobs they can do.
Years of experience	Multiple choice: Less than 1, 1-2, 3-5, 6-10, 10+.
Coverage area	Checkboxes or paragraph. Barangays/areas they can serve.
Emergency availability	Multiple choice: Yes, No, Sometimes.
Available days	Checkboxes: Mon, Tue, Wed, Thu, Fri, Sat, Sun.
Available time	Short answer. Example: evenings only, weekends, whole day.
Travel limits	Short answer. Maximum distance or areas not covered.

Provider Signup Form — Part 3

Pricing, work proof, verification, and consent.

Field	Input / Notes
Minimum service fee	Short answer. Example: PHP 300 inspection fee.
Price range examples	Paragraph. Ask for common prices for typical jobs.
Work sample photos	File upload or link. Photos of finished work, tools, or shop.
Certificate / training proof	Optional file upload or link.
Valid ID for verification	Optional during pilot; required for Identity Verified badge.
Consent to receive job requests	Yes/No. Required.
Consent to receive ratings	Yes/No. Required.
Agreement to provider rules	Checkbox: I understand and agree.

Provider Database Sheet — Columns 1

Use one row per provider. This is the main supply database.

Field	Input / Notes
Provider ID	Unique ID. Example: PROV-0001.
Date joined	Date provider was added.
Full name / Display name	Keep private/public name separate.
Contact number / Messenger link	Use for coordination.
Barangay / Area	Primary location.
Category / Specific skills	Main service and detailed services.
Years of experience	Trust signal.
Coverage area	Where provider can serve.

Provider Database Sheet — Columns 2

Track responsiveness, quality, and provider status.

Field	Input / Notes
Availability / Emergency availability	When provider can accept jobs.
Minimum fee / price range	Helpful for matching and client expectations.
Work sample link	Google Drive or folder link.
Verification level	Listed, Identity Verified, Work Verified, Top Rated, Certified/Business Verified.
Requests received / replies	Count requests sent and provider replies.
Response rate / average response time	Helps identify reliable providers.
Jobs completed / average rating	Trust and performance record.
Status / notes	Active, inactive, warning, suspended, removed.

Client Request Form — Part 1

Use the in-app form; keep this as backup. Use this to collect clear service requests.

Field	Input / Notes
Client name or nickname	Short answer. Nickname is okay during pilot.
Contact number or Messenger	Short answer. Required for coordination.
Barangay / area	Short answer or dropdown.
Exact location notes	Optional paragraph. Do not forward full address too early.
Service category needed	Dropdown using the approved pilot categories.
Problem description	Paragraph. Ask what happened, when it started, and what help is needed.
Urgency level	Emergency, Today, This Week, Flexible, Scheduled.
Preferred schedule	Short answer. Example: today after 3 PM.

Client Request Form — Part 2

Budget, evidence, permission, and consent.

Field	Input / Notes
Budget range	Multiple choice or short answer. Example: PHP 500–800.
Photos/videos of problem	File upload or link. Strongly recommended.
Permission to forward request	Yes/No. Required before contacting providers.
Can KAILA contact you for clarification?	Yes/No. Required.
Can provider contact you after selection?	Yes/No. Required for matching.
Willing to rate after completion?	Yes/No. Important for trust system.
Data privacy consent	Checkbox: I allow KAILA to use my submitted details for pilot matching.
Additional notes	Paragraph. Anything providers should know.

Request Tracker Sheet — Columns 1

Use one row per client request. This is the evidence tracker.

Field	Input / Notes
Request ID	Unique ID. Example: REQ-0001.
Date/time received	Important for response time.
Client name / contact method	Keep details private and organized.
Barangay / category	Helps measure demand by area and category.
Problem description	Clear summary of the need.
Urgency / budget	Used for matching and offer comparison.
Photo/video link	Optional evidence for provider estimate.
Request completeness	Complete, needs clarification, incomplete.

Request Tracker Sheet — Columns 2

Track matching, offers, job outcome, and issues.

Field	Input / Notes
Providers contacted	Names or provider IDs contacted.
Time forwarded to providers	Used to calculate response time.
Offers received	Amounts, schedule, and notes.
Selected provider	Provider chosen by client.
Agreed amount	Final price before job starts.
Job status	Received, forwarded, accepted, in progress, completed, rated, cancelled, disputed.
Ratings / issue	Client rating, provider rating, dispute or issue.
Final notes	Lessons, follow-up, repeat client potential.

Completed Job Log Template

Record completed or strongly matched jobs.

Field	Input / Notes
Job ID / Request ID	Use both IDs for easy tracing.
Client / Provider	Name or assigned ID.
Category	Service category.
Agreed amount	Final amount used for GMV.
Date posted / accepted / completed	Used for timing metrics.
Client rating / provider rating	Two-way trust data.
Issue encountered	No issue, price change, delay, quality, no-show, communication, other.
Repeat client / notes	Would client use again? Would provider accept again?

Dispute Log Template

Use factual records only. Avoid emotional language.

Field	Input / Notes
Dispute ID / Job ID	Unique ID and related job.
Complaint by	Client, provider, or KAILA operations.
Issue type	No-show, price change, poor quality, damage, payment, scope, rude communication, other.
Date reported	When issue was raised.
Description	Neutral summary of what happened.
Evidence collected	Request details, chats, photos, offer amount, agreed scope, completion confirmation.
Current status	Open, under review, resolved, closed, escalated.
Action taken / resolution	Warning, no action, restriction, status downgrade, suspension, removal.

Client Survey Form — Part 1

Use before and during pilot to validate demand.

Field	Input / Notes
Name or nickname	Optional but useful for follow-up.
Barangay / area	Helps identify demand geography.
Age range	Optional demographic grouping.
In the past 6 months, did you need a service provider?	Yes/No.
What service did you need?	Appliance, plumbing, electrical, computer, motorcycle, cleaning, digital, other.
How did you look for that person?	Referral, Facebook, Messenger, neighbor, shop, previous provider, other.
How long did it take?	Same day, 1–2 days, 3–7 days, more than a week, never found one.
What was the hardest part?	Paragraph. Capture pain point in their words.

Client Survey Form — Part 2

Trust, price, and willingness to use KAILA.

Field	Input / Notes
Did you compare prices?	Yes/No.
Was the price clear before the job started?	Yes/No/Somewhat.
What made you trust the provider?	Referral, known person, reviews, work samples, ID, shop, price, other.
Were you satisfied with the work?	1–5 rating or Yes/No.
Would you post a request in KAILA?	Yes/No/Maybe.
Would you upload photos/videos?	Yes/No/Maybe.
Would you compare offers from providers?	Yes/No/Maybe.
Would you rate the provider after completion?	Yes/No/Maybe.

Provider Interview Form — Part 1

Use for deeper provider understanding beyond signup.

Field	Input / Notes
What services do you offer?	Ask for specific jobs, not just category name.
How many years have you done this work?	Experience background.
How do clients usually find you?	Referral, Facebook, shop walk-ins, repeat clients, other.
How many jobs do you get weekly?	Estimate normal workload.
Do you want more clients?	Yes/No/Depends. Ask why.
What areas can you cover?	Barangays, city limits, travel fee rules.
Which jobs are most profitable?	Useful for category prioritization.
Which jobs do you avoid?	Avoid poor matches and disputes.

Provider Interview Form — Part 2

Offer behavior, verification, concerns, and platform trust.

Field	Input / Notes
Can you receive requests through Messenger/SMS?	Preferred channel and response habit.
Are you comfortable submitting offers?	Yes/No/Maybe. Ask concerns.
How do you estimate price?	Inspection fee, fixed fee, parts/labor, scope-based.
What makes a client difficult?	No-show, unclear scope, low budget, delayed payment, rude behavior.
What verification steps are acceptable?	ID, work samples, references, certificate, shop photo, pilot job history.
What concerns do you have about ratings?	Fear of unfair reviews, public complaints, client abuse.
What would make KAILA valuable to you?	More jobs, better clients, visibility, trust badge, performance summary.
Would you recommend another provider?	Ask for two referrals.

Provider Recruitment Script

Use this when contacting potential providers.

Short message

Good day! We are starting KAILA, a local pilot platform that helps people in Gingoog find trusted service providers like repairmen, electricians, plumbers, computer technicians, motorcycle mechanics, cleaners, and digital workers. The pilot is free. We will list reliable providers so clients can find you more easily. When a client has a request, we may contact you. You can accept, decline, or give your own offer. Would you like to be included as one of the early KAILA providers?

Follow-up

If yes, I can send you a short provider signup form. It asks about your services, area covered, availability, price range, and work samples so we can match you with the right requests.

Client Request Confirmation Script

Send after a client submits a request.

Confirmation

Thank you for submitting your request to KAILA. We will review the details and look for matching providers. We may contact you if we need more information. Please note that this is still a pilot, and providers are independent service providers.

Clarification

To help providers estimate better, please send a clear photo/video of the problem, your preferred schedule, and your estimated budget range if you have not included them yet.

Provider Request Forwarding Script

Send to 3–5 matching providers for each request.

Request format

KAILA Request #001

Category: Plumbing

Area: Barangay 23, Gingoog City

Problem: Clogged kitchen sink

Urgency: Today

Budget: PHP 500–PHP 800

Can you take this job? If yes, please send your offer and available time.

Operating note

Do not share unnecessary private client details too early. Record who replies, how fast they reply, offer amount, available time, and any scope notes.

Offer Comparison Template

Use this when presenting options to the client.

Field	Input / Notes
Provider A	Offer: PHP 600 Available: 2 PM today Trust: Listed Notes: Has plumbing experience.
Provider B	Offer: PHP 750 Available: 5 PM today Trust: Work Verified Notes: Has previous job photos.
Provider C	Offer: PHP 500 Available: Tomorrow Trust: Identity Verified Notes: Lower price but not available today.
Client instruction	Please choose the provider you prefer. Final scope and price should be clear before work starts.

Completion and Rating Templates

Collect two-way ratings after the job.

Client rating message

Hello! Was the job completed? Please rate the provider from 1 to 5 and share any comments about the service. Was the agreed price followed? Would you use KAILA again?

Provider rating message

Hello! Was the job completed? Please rate the client from 1 to 5 and share if there were any issues. Would you accept KAILA requests again?

Provider Rules Agreement

Each provider should agree before receiving pilot requests.

- ☐ Respond honestly and only accept jobs you can perform.
- ☐ Give clear price or estimate before the job starts.
- ☐ Do not unfairly change price after arrival unless scope changes.
- ☐ Communicate delays early.

- ☐ Respect client property and privacy.
- ☐ Do not harass, threaten, pressure, or abuse clients.
- ☐ Allow KAILA to track job outcome during the pilot.
- ☐ Accept that ratings and reviews are part of the trust system.

Client Reminders Template

Explain these before matching the client with a provider.

- ☐ KAILA is a pilot matching system.
- ☐ Providers are independent service providers, not KAILA employees.
- ☐ Clear descriptions and photos help providers estimate better.
- ☐ Final price and scope should be agreed before work starts.
- ☐ Scope changes may affect price.
- ☐ Client should confirm completion after the job.
- ☐ Client should give a fair rating after completion.
- ☐ Issues should be reported honestly with details and evidence.

Weekly Metrics Summary Template

Use this after every weekly review.

Field	Input / Notes
Week covered	Start date to end date.
Providers joined / active	Total listed, active, inactive, category coverage.
Client requests	Total requests, top categories, top barangays, urgency mix.
Matching performance	Providers contacted, offers per request, average response time, accepted jobs.
Job outcomes	Completed jobs, strongly matched jobs, cancelled requests, no-response requests.
Trust and quality	Average ratings, disputes, complaints, top provider issues.
GMV	Total peso value of completed jobs.
Next actions	Owner, task, deadline.

Weekly Meeting Notes Template

Use this for founder/team meetings.

Field	Input / Notes
Date and attendees	Who joined the meeting.
Decisions made	List each decision clearly.
Assumptions tested	What was proven or disproven this week?
Metrics reviewed	Providers, requests, offers, jobs, ratings, disputes, GMV.
Problems found	Top 3 operational or trust issues.
Lessons learned	What changed because of this week's evidence?
Next actions	Task, owner, deadline, status.
Open questions	Items to test next week.

Go / No-Go Scorecard — Part 1

Use after the 30–45 day active matching pilot.

Field	Input / Notes
Providers recruited	Target: 50 listed providers. Score 0–5.
Active provider rate	How many providers actually reply? Score 0–5.
Client responses	Target: 100 survey responses or strong early evidence. Score 0–5.
Real requests	Target: 30 real requests. Score 0–5.
Offers per request	Target: ideally 2–5 offers per good request. Score 0–5.
Completed / strongly matched jobs	Target: 15+. Score 0–5.

Go / No-Go Scorecard — Part 2

Rate trust, quality, and operational feasibility.

Field	Input / Notes
Ratings behavior	Clients and providers accept two-way ratings. Score 0–5.
Disputes manageable	Disputes are low or manageable with clear records. Score 0–5.
Category strength	At least 2–3 categories show real activity. Score 0–5.
Operations workload	Team can support manual matching. Score 0–5.
Repeat potential	Clients/providers would use KAILA again. Score 0–5.
Decision rule	Proceed if evidence is strong; narrow if only few categories work; redesign/pause if trust or participation is weak.

Final Pilot Report Template — Part 1

Prepare this before deciding whether to build the MVP.

Field	Input / Notes
Executive summary	Brief result: proceed, narrow, redesign, or pause.
Pilot area and dates	Barangays covered and active matching period.
Provider results	Total providers, active providers, categories covered, top providers.
Client validation results	Survey count, strongest pain points, willingness to use KAILA.
Request results	Total requests, category distribution, barangay distribution, urgency mix.
Matching results	Providers contacted, response rate, offers per request, time to first response.

Final Pilot Report Template — Part 2

Include financial, trust, and recommendation details.

Field	Input / Notes
Job outcomes	Completed jobs, strongly matched jobs, cancelled requests, no-response requests.
GMV	Total value of completed jobs.
Ratings and trust	Average client rating, provider rating, comments, trust issues.
Disputes	Number, types, actions taken, unresolved issues.
Best categories	Categories with strongest demand and provider response.
Recommended next move	Proceed to MVP, narrow categories, extend pilot, redesign, or pause.

MVP Feature Backlog Template

Use only after strong validation signals.

Field	Input / Notes
Feature	Short name of feature. Example: Client request posting.
User role	Client, provider, admin, operations.
Pilot evidence	Which manual workflow proved this feature is needed?
Priority	Must have, should have, later.
Acceptance criteria	How to know the feature works.
Risks	Privacy, safety, complexity, cost, or adoption risks.
Do not build yet	Payments, GPS tracking, native apps, complex AI matching, large automation.

Provider Visibility Offer Template

Draft only after providers feel real value from KAILA.

Field	Input / Notes
Free provider profile	Basic listing, can receive requests, basic category inclusion.
Premium provider profile	Featured placement, better profile layout, more work photos, trust badge display.
Monthly performance summary	Requests received, replies, jobs completed, ratings, response speed.
Facebook feature	Optional featured post for trusted active providers.
Badge display	Identity Verified, Work Verified, Top Rated, Certified/Business Verified.
Important rule	Do not charge until usage and trust are proven. Avoid commission as the first paid product.

Folder and File Structure Template

Keep files organized from Day 1.

Field	Input / Notes
01_Admin	Founder notes, decision log, budget, meeting notes.
02_Provider_Database	Provider sheet, provider forms, work samples, verification tracker.
03_Client_Requests	Request tracker, request photos/videos, request summaries.
04_Job_Logs	Completed job log, ratings, GMV tracker.
05_Disputes	Dispute log, evidence, actions taken.
06_Marketing	Facebook posts, logo, graphics, provider features.
07_Reports	Weekly summaries, pilot report, scorecards.
08_MVP_Planning	Feature backlog, database notes, wireframes, build plan.

Quality Check Before Launch

Use this before accepting public requests.

- ☐ Facebook page is ready and understandable.
- ☐ Provider form and provider sheet are tested.
- ☐ Client request form and request tracker are tested.
- ☐ Provider rules and client reminders are written.

- ☐ At least 20 providers have been contacted.
- ☐ First provider profiles are grouped by category.
- ☐ Request forwarding script is ready.
- ☐ Offer comparison, completion, and rating templates are ready.

Final Success Targets

Use these as the first-pilot evidence targets.

50 providers

Target supply base

100 client responses

Demand validation

30 real requests

Live pilot demand

15 completed / matched jobs

Minimum strong evidence

5-8 categories

Focused service scope

30-45 days

Active matching period

Final Reminder

Do not build the full KAILA app yet.

Build proof first: provider list, client request form, request tracker, manual matching, offer comparison, completion confirmation, rating process, weekly review, and go/no-go decision.

Once this works, the MVP becomes easier because it is built from actual behavior.
