

KAILA Business Model Canvas

Strategic startup models, assumptions, and decision rules

Business Model Canvas

Use this section as a discussion document. Each box contains early assumptions that must be tested through interviews and pilot operations. Canvas Block KAILA Assumption Customer Segments Clients: households, renters, homeowners, small businesses, students, local institutions. Providers: skilled workers, technicians, freelancers, odd-job workers, certified and experienced-but-uncertified providers. Value Propositions Clients find trusted local help faster. Providers become visible, get opportunities, and build reputation. Communities unlock local skill supply. Channels Facebook page, community groups, Messenger, referrals, barangay networks, college alumni networks, local business partners, mobile-friendly website, future mobile app. Customer Relationships Trust-based marketplace, ratings, reviews, provider profiles, verification badges, support desk, dispute handling, community moderation. Revenue Streams Free pilot. Later: featured listings, premium profiles, lead credits, subscription plans, small commissions, advertising partnerships, business accounts. Key Resources Founder team, provider network, client base, platform, brand, verification system, operations playbook, community trust. Key Activities Provider recruitment, market validation, request matching, platform development, support, moderation, verification, marketing, analytics. Key Partners Skilled workers, local repair shops, hardware stores, electronics stores, schools, community leaders, local businesses, future payment partners. Cost Structure Domain, hosting, SMS/email notifications, branding, local marketing, field recruitment, support, legal setup, payment processing, development time.

Lean Canvas

This version is more startup-focused and should be revisited after validation. Canvas Block KAILA Assumption Problem Clients cannot easily find trusted service providers. Skilled workers remain invisible. Social media referrals are scattered and hard to compare. Customer Segments Pilot city households and small businesses; local skilled workers seeking more jobs. Unique Value Proposition KAILA answers "Naa moy kaila?" with trusted, rated, local service providers. Solution Request posting, category matching, offers/counter-offers, provider profiles, ratings, verification, urgency handling. Channels Facebook, Messenger, referrals, community posts, provider network, partner shops, local campaigns. Revenue Streams Start free; later provider visibility, lead credits, subscriptions, commissions, ads, partnerships. Cost Structure Operations, marketing, hosting, verification, development, support, legal/admin. Key Metrics Active providers, posted requests, response rate, completed jobs, repeat use, ratings, provider earnings. Unfair Advantage Founder understands the client, provider, and developer perspective; local insight; early network through friends and community.

Assumption Register

The team should not debate opinions endlessly. Convert opinions into testable assumptions. Assumption How to Test Pass Signal People struggle to find reliable local Survey 100 residents and ask recent At least 60% report difficulty or delays. services. experience. Providers want more visibility. Interview 50 providers. At least 60% are willing to be listed. Providers will respond to job alerts. Manual pilot using Messenger. At least 40% response within 2 hours. Clients will use a structured platform Offer Google Form request flow. At least 30 real requests in 30 days. instead of Facebook. Ratings are acceptable to both Ask in interviews and pilot. At least 70% agree to rating after job. sides. A negotiation model fits local culture. Test budget + counter-offer. Most providers understand and use offers properly.

Business Model Decision Rules

- Do not monetize before the marketplace shows repeat usage.
- Do not expand to a second city until the first city shows provider responsiveness and completed jobs.
- Do not build complex app features before manual matching proves demand.
- Do not require certificates as the only trust factor; prioritize reputation and verification layers.
- Do not call the pilot successful based on signups alone. Completed jobs matter most.

Definition of Terms

These terms provide a shared vocabulary for reading and discussing the KAILA founder package.

KAILA

The proposed local services marketplace that helps clients find trusted local help and helps skilled workers become more visible.

Client

A person, household, business, or organization that posts a service need or hires a provider through KAILA.

Provider

A skilled worker, freelancer, technician, shop, or service professional who offers work through KAILA.

Service Request

A client post describing the job needed, location, budget, urgency, details, and optional photos or files.

Offer

A provider's response to a service request, including price, availability, scope notes, or proposed schedule.

Counter-Offer

A revised offer made when the provider or client proposes a different price, schedule, or service scope.

Marketplace

The two-sided system where clients and providers discover, evaluate, transact, and rate each other.

MVP

Minimum Viable Product; the simplest usable version of KAILA needed to test marketplace behavior.

Pilot

A limited real-world launch in one city or area used to validate demand, provider response, operations, and trust.

Concierge Pilot

A manual version of the marketplace run with simple tools such as forms, spreadsheets, Facebook, and Messenger before building the full app.

Verification

The process of checking provider identity, service information, work samples, permits, certificates, or references.

Rating

A post-job score or review used to build trust, measure reliability, and improve future matching decisions.

Dispute

A reported disagreement about price, quality, scope, completion, behavior, payment, or other job-related concerns.

Lead Credit

A future monetization unit that may allow providers to access or respond to qualified service opportunities.

Premium Profile

A future paid provider profile upgrade that may improve visibility, presentation, or trust signals.

Business Account

A future account type for shops, small businesses, teams, or organizations with recurring service needs or multiple providers.

Go/No-Go Criteria

The evidence-based thresholds used to decide whether to proceed, narrow the scope, redesign, or pause.
