

KAILA Pitch Deck

A local services marketplace that helps people find trusted local help and helps skilled workers become visible. Working tagline: Kung wala kay kaila, naa mi.

The Everyday Problem

- When something breaks, people ask: "Naa moy kaila?"
- Clients rely on referrals, Facebook posts, and Messenger chats.
- Skilled workers rely on word-of-mouth and remain invisible beyond their networks.

The Opportunity

- The problem is not only lack of workers. The deeper problem is broken discovery.
- Philippine communities have many skilled people, but no organized local marketplace for everyday services.
- A dense city-level pilot can prove the model before expansion.

The Solution

- Clients post service requests with budget, urgency, location, and photos/videos.
- Providers receive matching requests and accept or counter-offer.
- Clients choose based on offer, rating, completed jobs, and availability.
- Both sides rate each other after completion.

Why KAILA Is Different

- Built around local behavior and language, not a generic tech concept.
- Includes certified and experience-based providers.
- Focuses on ratings, verification, and completed job history.
- Starts local and operational, not nationwide and overbuilt.

Initial Categories

- Appliance repair, plumbing, electrical, computer repair, mechanical, carpentry, welding, graphic design, and general odd jobs.

Business Model

- Phase 1: Free pilot to validate usage.
- Phase 2: Premium visibility and featured provider profiles.
- Phase 3: Lead credits, subscriptions, commissions, business accounts, and partnerships.

Go-To-Market

- Recruit providers before public client launch.
- Start with one city or barangay cluster.
- Use Facebook, referrals, community partners, and provider-to-provider recruitment.
- Run concierge pilot before building full app.

Validation Targets

- Interview 100 residents and 50 providers.
- Recruit first 50 providers.
- Collect at least 30 real service requests in pilot period.
- Complete or strongly match at least 15 jobs.

MVP Scope

- Registration, profiles, categories, request posting, offers/counter-offers, messaging, completion, ratings, admin dashboard.
- Avoid in-app payments, GPS tracking, native mobile app, and complex features at the start.

Key Metrics

- Active providers, posted requests, response time, completed jobs, repeat usage, rating completion, dispute rate, provider earnings, total job value facilitated.

Team Needs

- Business and strategy lead.
- Provider acquisition lead.
- Operations and support lead.
- Marketing and community lead.
- Finance/admin lead.
- Product and technology lead.

The Ask for Co-Founders

- Help validate demand.
- Help recruit the first provider network.
- Help design operations and trust systems.
- Commit to clear roles, ownership discussion, and 90-day validation plan.

Closing

KAILA is not just another app idea. It is a practical attempt to make skilled people visible and help communities solve everyday problems faster.

Definition of Terms

These terms provide a shared vocabulary for reading and discussing the KAILA founder package.

KAILA

The proposed local services marketplace that helps clients find trusted local help and helps skilled workers become more visible.

Client

A person, household, business, or organization that posts a service need or hires a provider through KAILA.

Provider

A skilled worker, freelancer, technician, shop, or service professional who offers work through KAILA.

Service Request

A client post describing the job needed, location, budget, urgency, details, and optional photos or files.

Offer

A provider's response to a service request, including price, availability, scope notes, or proposed schedule.

Counter-Offer

A revised offer made when the provider or client proposes a different price, schedule, or service scope.

Marketplace

The two-sided system where clients and providers discover, evaluate, transact, and rate each other.

MVP

Minimum Viable Product; the simplest usable version of KAILA needed to test marketplace behavior.

Pilot

A limited real-world launch in one city or area used to validate demand, provider response, operations, and trust.

Concierge Pilot

A manual version of the marketplace run with simple tools such as forms, spreadsheets, Facebook, and Messenger before building the full app.

Verification

The process of checking provider identity, service information, work samples, permits, certificates, or references.

Rating

A post-job score or review used to build trust, measure reliability, and improve future matching decisions.

Dispute

A reported disagreement about price, quality, scope, completion, behavior, payment, or other job-related concerns.

Lead Credit

A future monetization unit that may allow providers to access or respond to qualified service opportunities.

Premium Profile

A future paid provider profile upgrade that may improve visibility, presentation, or trust signals.

Business Account

A future account type for shops, small businesses, teams, or organizations with recurring service needs or multiple providers.

Go/No-Go Criteria

The evidence-based thresholds used to decide whether to proceed, narrow the scope, redesign, or pause.
